

COVERS UP TO 800 SQ FT

Lawn Dr. Ron has created the perfect mix of over 30 ingredients for all blooming plants. N-P-K is not as important as making the soil breath. Air is 79% nitrogen, so allowing air into the soil increases nitrogen levels in the soil, naturally. This blend will increase the species diversity of microbes in your soil. It contains a heavier mineral and silica content than any of Ron's other blends, so we can promote blooming and fruit production with less disease and insect problems. This blend contains no manure. For new landscape beds, till in half the recommended rate and top dress with the other half.

Super Bloom is designed for use all year long. You can apply a small amount in the hole when planting, but it is best applied as a top dressing.

Ingredients: Blood Meal, Bat Guano, Cottonseed Meal, K-mag, Corn Gluten Meal, Fish Meal, Feather Meal, Humate, Diatomaceous Earth, Micro-nutrients, Kelp, Urea, Dried Molasses, Alfalfa Meal, Corn Meal, Ground Oats, Rice Bran, Soybean Meal, Sunflower Meal, Granite, Lava Sand, Basalt, Soft Rock Phosphate, Greensand and Montmorillonite.

Recommended application rate: Landscape beds – 2-4 lbs/100 sq. ft.
Vegetable & Color beds – 5 lbs/100 sq. ft.

For best results, reapply every 2-4 weeks.

15 LBS Net Weight - \$22.50
